# IT IS ALL ABOUT OAK

Whether we talk about décor trend for 23-24, OAK is the essence, still the consumer's favourite.

The aim is to create calmer and more harmonious decors from light, pure natural tones through to nutmeg brown tones.

Designs remain very close to the original wood patterns with authentic, light, friendly, and fresh decors, with natural matte texture as well as subtle knots, that translate a harmonious look.

Blond, natural brown, whitened oak colours will please the customer's eye and recreate a natural and warm cosy cocoon at home.
